

1 Line 4 Port Telephone Expansion Module PCB

The 1 Line 4 Port Telephone Expansion Module is a snap-in module which locates into any of the dedicated positions on the HNS swing frame. The module is used to distribute the incoming telephone line into 4 locations. Each of the telephone extensions can then be patched within the panel to service the appropriate room in the property. The compact 4 way module features an un-shuttered design with a double window labelling system for clear identification. Please note this is a populated PCB (Printed Circuit Board) only.

Specification:

- Meets all ISO/TIA Category 6 Performance standards
- Backward compatible with Cat 5e and Cat 5
- 568A or 568B wiring options
- Rear cable management clip
- Tool-less, snap-in fixing
- Supports standard IDC punch-down tools
- Dimensions W x D x H: 65 x 18 x 40mm

Subject to design changes. 04/06
