

Green Patch Lead (300mm)

The Green Patch Lead's are used of patching a Voice service to a panel within the HNS swing frame which in turn supplies the desired room with a Voice service. A standard RJ45 connector is terminated on either end of the Cat 5e cable, measuring 300mm in length.

Specifications:

- ISO/TIA standards compliant
- Green sheath for service type identification
- Feature pr-terminated RJ45 connector on either end
- Integrated retention clip on connectors
- Length 300mm
